

Prof. Bohumír Strnadel Attending The 13th Global University Network (N.E.W.S) Conference & 2016 Wuhan Forum of World Renowned Scientists Lecturing in Hubei

18. – 19. 10. 2016, invited by Hubei University of Technology, Prof. Ing. Bohumír Strnadel, DrSc. attended the 13th Global University Network (N.E.W.S) Conference & 2016 Wuhan Forum of World Renowned Scientists Lecturing in Hubei.

As one of 100 distinguished experts employed by Hubei province, Prof. Ing. Bohumír Strnadel, DrSc. has given two lectures in the conference, the first one was to introduce VSB - Technical University of Ostrava and Centre of Advanced and Innovation Technologies, the second one was on *Transdisciplinary Research in International Teams*. Transdisciplinary research (TDR), which is increasingly used in project management and implementation, is an effective concept enabling society to progress towards sustainable development. Prof. Strnadel has introduced TDR and analyzed the characteristics of TDR and pointed out the practical issues and challenges which international TDR team meets. The lecture accepted highly recognition from the conference chairman and members.

Prof. Strnadel has met the persons from dept. of Science & Technology, the faculty of Civil Engineering, discussed in-depth about the "Proposals for further cooperation between Hubei University of Technology (HBUT) and VSB - Technical University of Ostrava (VSB-TUO)". This proposal has given the feasibility analysis to establish Czech-Chinese Centrum – cooperation platform in teaching, research & cooperation with industry. This platform will extend significant role in accelerating and deepening the cooperation between VSB-TUO and HBUT, between Moravia and Hubei province in the future.
